adverse effect

what is climate displacement?

...is displacement due to climate disasters that physically destroy or damage property beyond repair and require inhabitants to abandon the property.

of all disaster displacement was due to climate, as opposed to conflict

%

If you breakdown that **98%**, you will See...

Floods 30.7%

Other 3.5%

30.7

million

Drivers of Climate Displacment

0 6 R CD mate Ō 5 9 T Ŋ

1. Storm Intensity

More frequent and more intense

This can lead to increased flooding in areas causing landslides, infrastructure destruction, and more.

2. Wildfires

More frequent and more severe

Areas with dryer air are seeing extremely long instances of wildfires. This was the main cause of displacement in the US in 2020.

3. Sea Level Rise

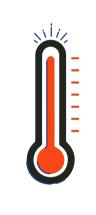

4ft sea level rise by 2100

As the polar ice caps melt from extreme temperatures, islands, and coastal cities will see major sea level rise and possibly cease to exist by 2050.

4. Extreme Heat

Heatwaves are hotter and longer

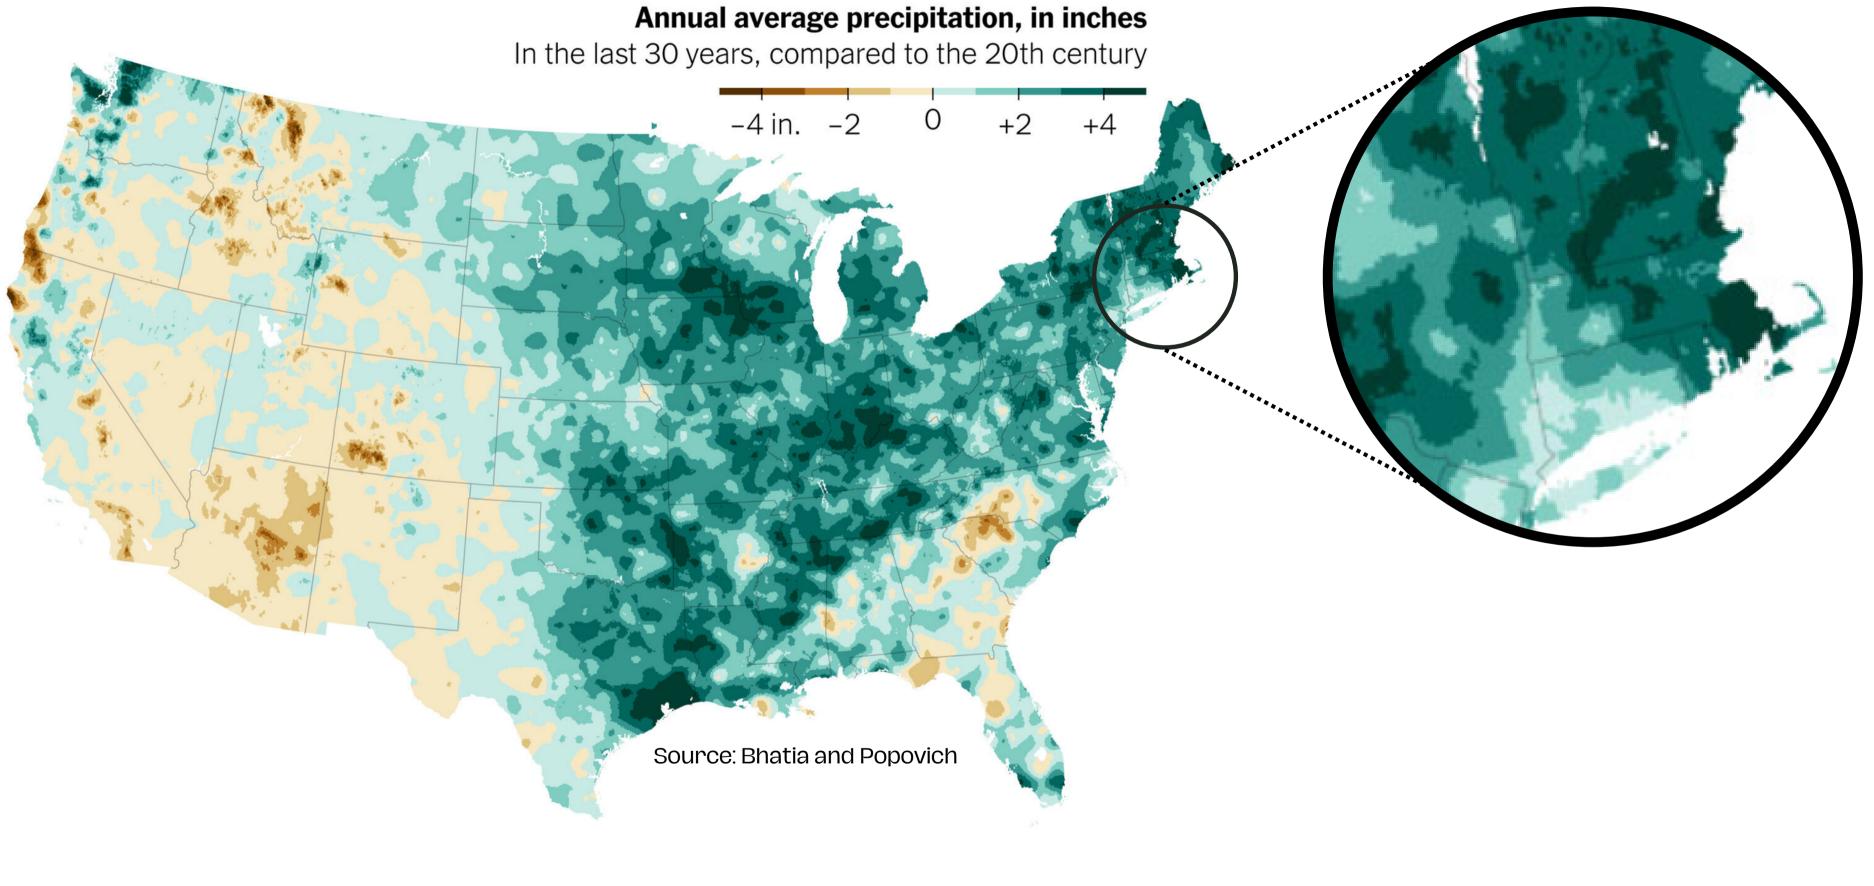

5. Drought

Average high temperatures continue to increase all across the globe and in major cities urban heat island effect is increasing temperatures even more.

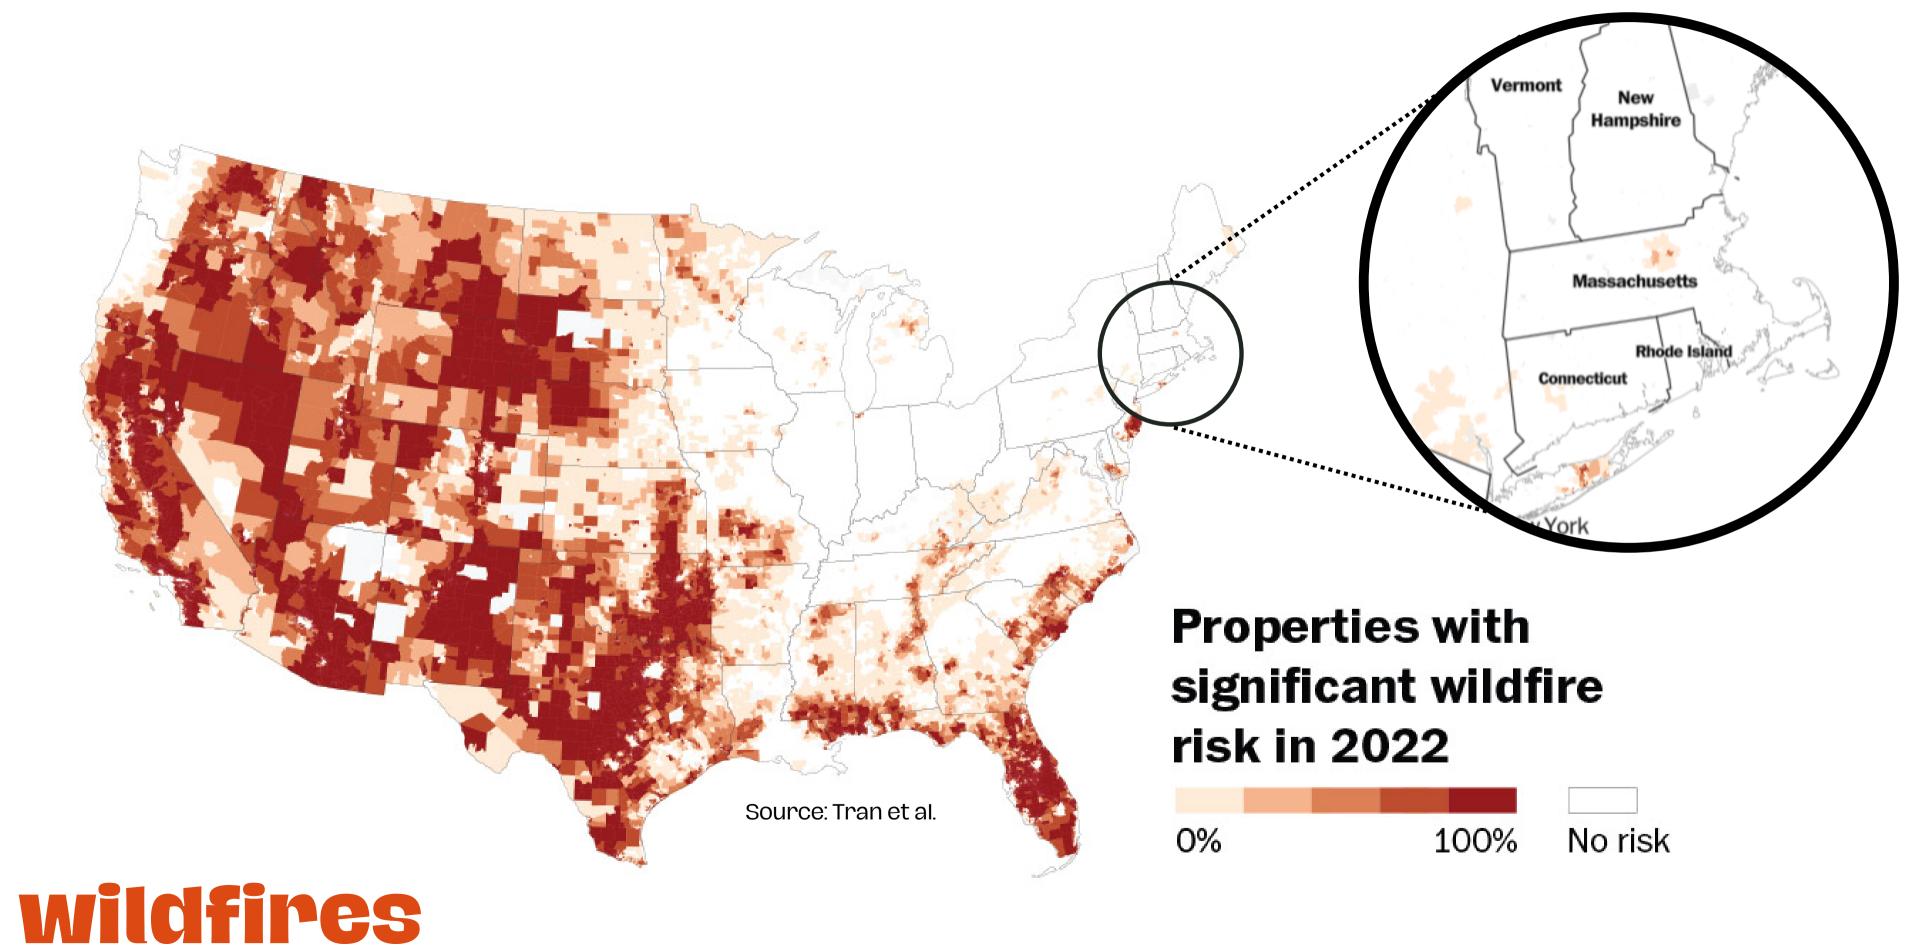

Less precipitation in dryer areas

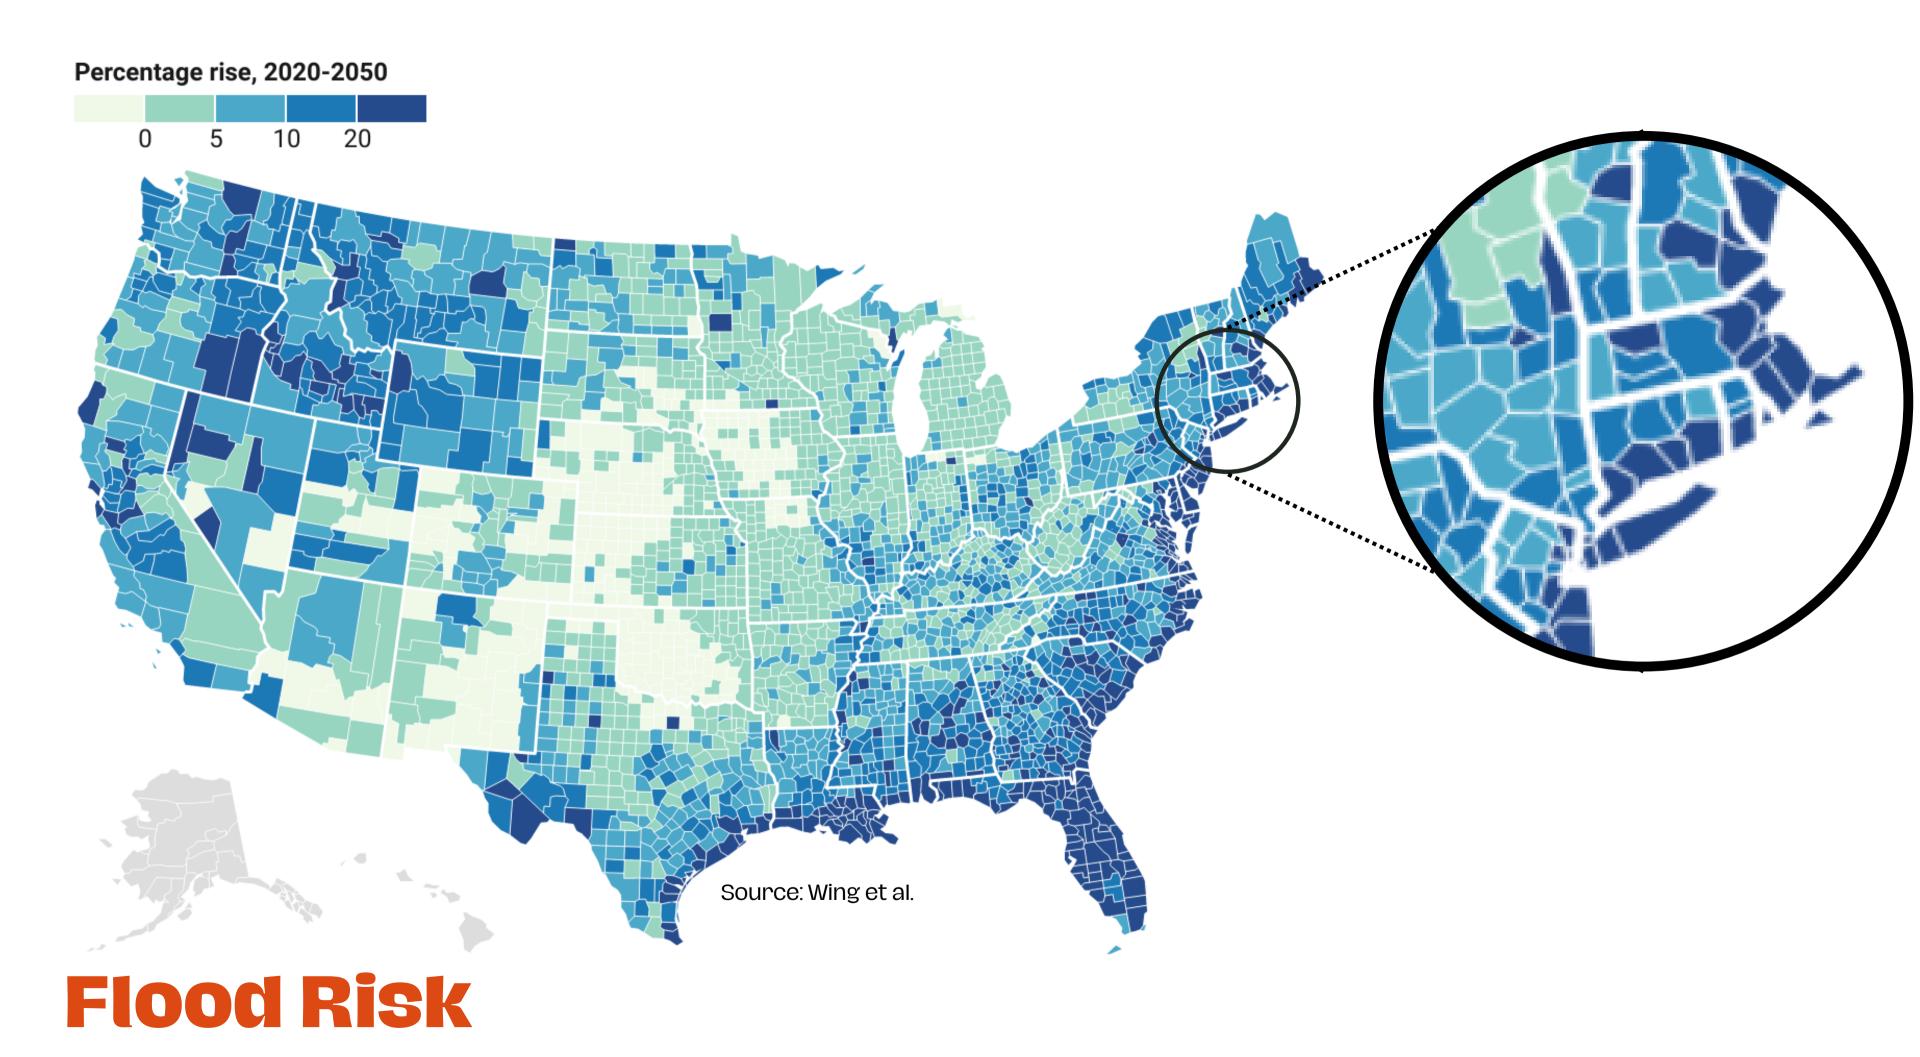

Areas with historically dryer air are seeing more intense drought seasons which will soon effect agriculture stock in many places.

Storm Intensity & Drought

How Does Climate Displacement Work?

Climate Change Threat Multiplier

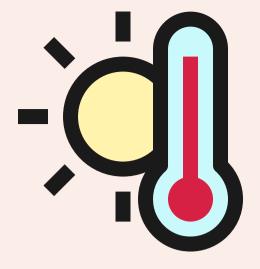

Water Scarcity- Drought

Abnormally Heavy Rainfall

Crops & Livestock Struggle to Survive = Hunger

Unbearable Heat

Increased Occurrence of Natural Disasters

Puerto Ricans In MA Hurricane Maria 2017

Figure 1: Puerto Rican Population from 2008 to 2017

Source: 2008-2017 American Community Survey

Source: Latinos in Massachusetts: Puerto Ricans (ScholarWorks at UMass Boston)

Boston has an incredibly diverse population. The following graph jshows the growth of the Puerto Rican population in the State before and after Hurricane Maria (2017).

Who is most at risk?

Those least equipped to recover and adapt

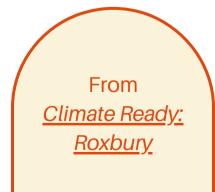

- Vulnerable Populations
 - Lacking resources
 - Lacking education
 - Lacking healthcare
 - Elderly
 - Developing Countries

Reimagining Bodegas

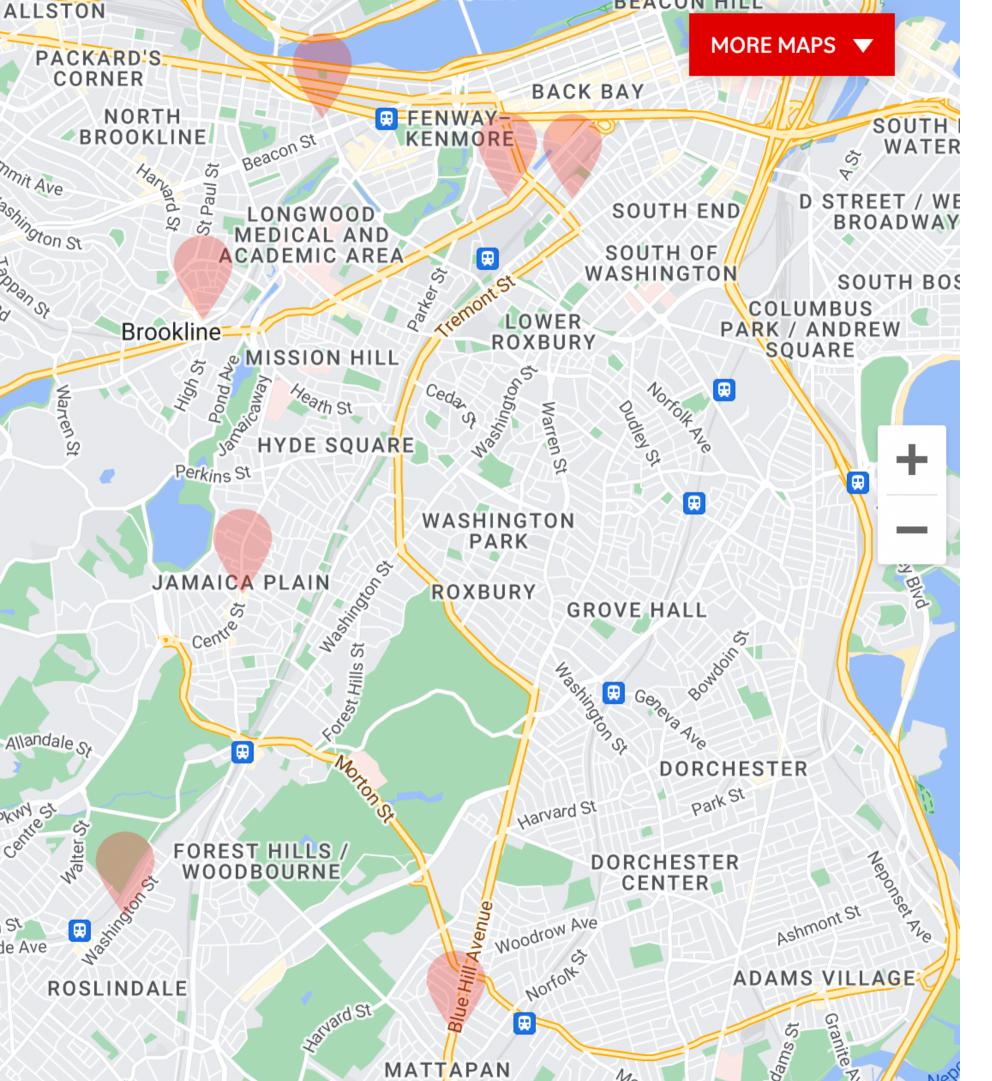

• Can Bodega's be places where people have access to free food? • A system of community fridges integrated within the bodegas Case study: Healthy Bodega Initiative, NY

Bodega x Community Fridges

Community Fridges are maintained by people in the community for people in the community

From Eater Boston

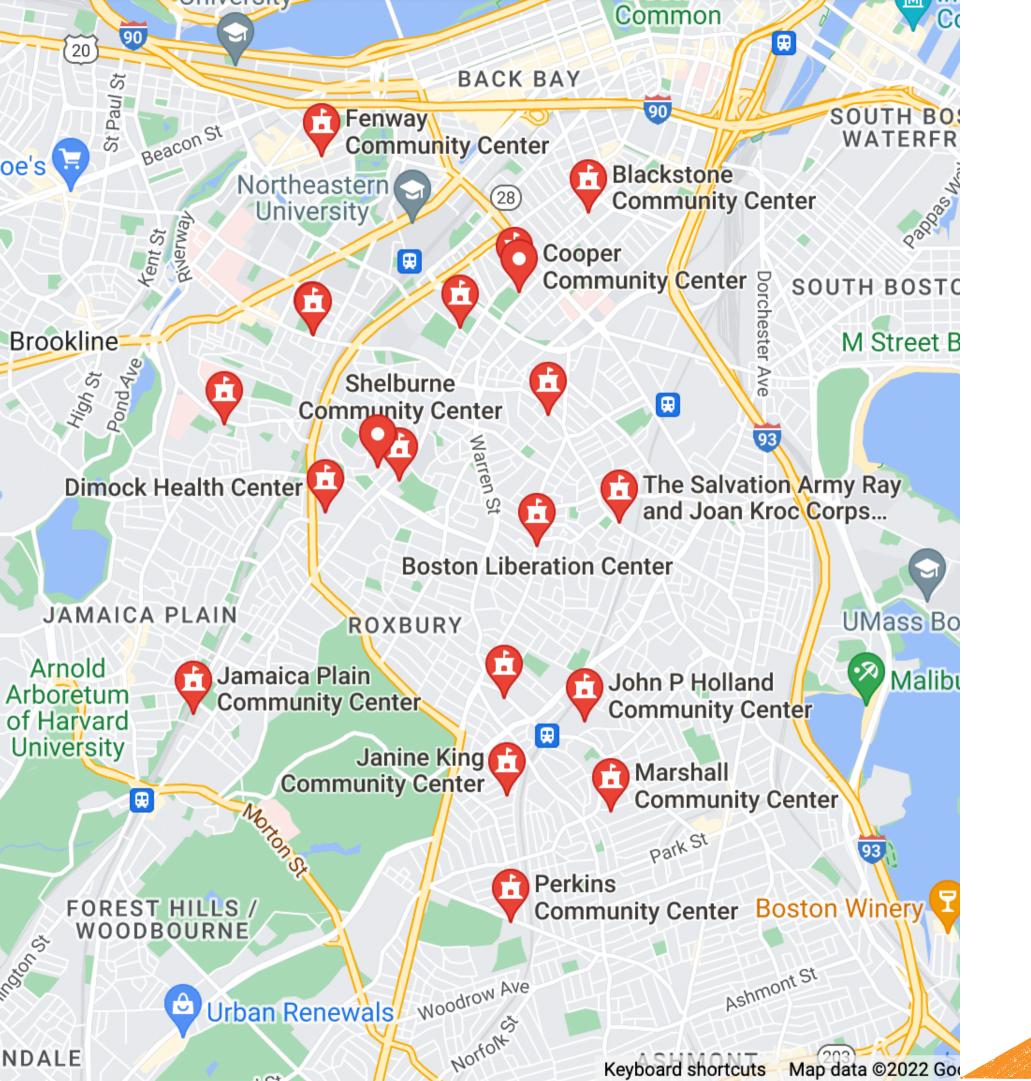

Mutual aid initiatives have been springing up nationwide during the pandemic, as community members look for ways to address food insecurity and other needs of their neighbors. And then there are community fridges, which have begun to appear in neighborhoods nationwide, including in and around Boston. These outdoor fridges, often built under a roof alongside some pantry shelves, are typically monitored and stocked by volunteers, filled with everything from fresh produce to canned goods and sometimes even toiletries and other non-food household essentials.

Existing Community Fridges

Community Centers

- Information hubs on disaster relief
- Resource allocation
- Community building
- Emergency shelter
- Neighborhood empowerment network
